

AMENDMENT TO THE ABSTRACT

The following abstract will replace all prior versions of the abstract in the application:

The invention relates to a fire-extinguishing mist projector ~~(40)~~(1) for producing a jet of mist oriented along an injection jet axis (7). Said mist projector comprises an ejector (8) which is supplied with high-pressure water, generates a jet of water ~~(4)~~(10) parallel to the injection jet axis (7), and is arranged in such a way that it can rotate about the injection jet axis (7). The inventive mist projector is characterized in that the projector is surrounded by a open-ended jacket tube (11) that is concentric to the injection jet axis (7).
